WHAT IS THE TRANSPORT MANAGEMENT SYSTEM?

An **end-to-end operations platform** that replaces paper-based processes with structured digital operations — covering trips, drivers, vehicles, expenses, payroll and reporting in a single connected system.

- Replaces paper-based processes with structured digital operations
- Covers trips, drivers, vehicles, expenses, payroll & reporting
- Built specifically for Sri Lankan transport companies
- Web-based — accessible from any device, anytime
- Role-based access for Admin, Manager, Operator & Viewer

OPERATIONS · 13 MODULES

Core Operations Management

The day-to-day transaction engine that runs your fleet, end to end.

TRP

Trip / Running Chart

Core trip record — vehicle, driver, route, revenue.

TEX

Trip Expense Entry

Log toll, loading and trip-linked costs.

FUL

Fuel Entry

Track fuel fills — litres, rate, cost, odometer.

VEX

Vehicle Expense Entry

Repairs, maintenance, tyres and bodywork costs.

ADV

Driver Advance

Cash advances auto-deducted in payroll.

DED

Deduction

Salary deductions for drivers and cleaners.

LON

Loan

Staff loans with repayment schedule tracking.

PAY

Payment / Salary Disburse

Record salary payments to drivers and cleaners.

DSS

Driver Salary Settlement

Monthly payroll — gross earnings, deductions, net pay.

CSS

Cleaner Salary Settlement

Same structured payroll workflow for cleaners.

CSF

Cash Flow

All business cash in/out with running balance.

DCP

Driver-Cleaner Pairing

Assign cleaners to drivers for a defined period.

GEX

General Expense Entry

Track operational costs not tied to a vehicle or trip.

FOUNDATION · 12 MODULES

Master Files & Company Management

Clean, centralized records — the foundation everything else is built on.

MASTER FILES — 7 MODULES

DRV

Driver Master File

Register drivers with licence, DOB & status tracking.

VEH

Vehicle Master File

Full vehicle registry — plate, type, fuel type.

CLN

Cleaner Master File

Manage cleaners linked to payroll & trips.

CUS

Customer Master File

Customer database with contact details.

ITM

Item Master File

Cargo / item type catalogue for trip entries.

LOC

Location Master File

Pickup & delivery locations for route tracking.

GET

General Expense Type

Standardized expense categories for clean reporting.

COMPANY MANAGEMENT — 5 MODULES

**CO
M**

Company Profile

Central hub for company settings & reference sequences.

USR

Create User

Register users with role assignment & reference numbers.

PRM

User Permissions

Fine-grained module-level access per user.

**PW
D**

Password Change

Secure self-service password management.

EDU

Edit / Deactivate User

Update profiles & manage active status.

INTELLIGENCE · 7 CATEGORIES

Reporting & Business Intelligence

From morning briefings to board-level KPIs — answers, not guesswork.

Executive Reports (2)

BPS — Business Performance Summary — comprehensive KPIs for management.

DBS — Daily Business Snapshot — one-page daily summary for morning briefings.

Fleet Reports (7)

VPF — Vehicle Performance — trips, revenue & expenses per vehicle.

FEF — Fuel Efficiency — KPL per vehicle, efficient vs wasteful.

MEV — Most Expensive Vehicle — rank by total expense.

Operations Reports (5)

TRV — Trip Revenue — revenue per trip, filterable by vehicle/driver/customer.

RPR — Route Profitability — most profitable routes after expenses.

Staff Reports (10)

DPF — Driver Performance — trips, revenue & efficiency per driver.

DSH — Driver Salary Sheet — detailed individual salary sheet.

Financial Reports (6)

CFS — Cash Flow Statement — full period inflows/outflows.

MNP — Monthly Profit Report — month-by-month P&L.

Payroll Self-Service (5)

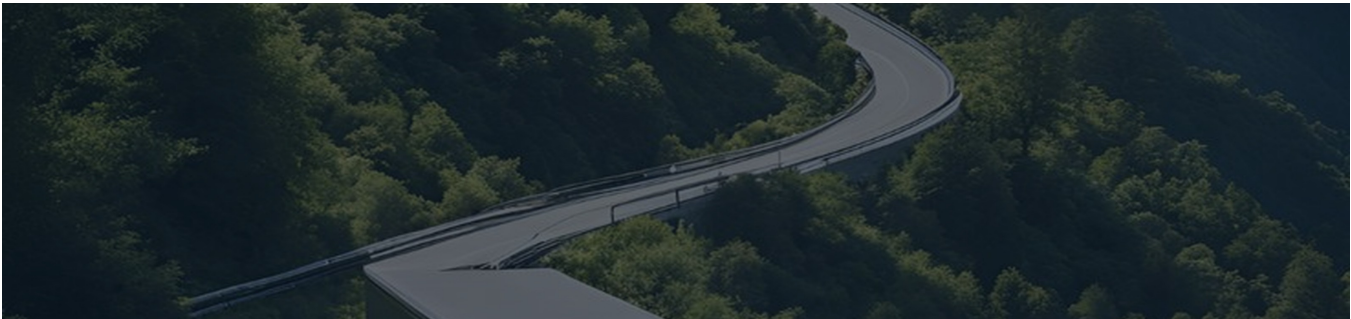

MYT/MYE/MSS/MYA/MLS — My Trips, Earnings, Salary Statement, Advances & Loan Status.

Analytics Reports (5)

PPK — Profit per KM — ultimate per-vehicle efficiency metric.

TPV — Top Performing Vehicle — rank by revenue or trips.

Every report supports **date range filtering** and **export to PDF, Excel, CSV & Print**.

WHY ONES N ZEROS ERP

Built for Transport. Proven in the Field.

Not a generic ERP adapted for logistics — purpose-built from day one.

● End-to-End Coverage

From trip recording to payroll settlement — every operational step in one system.

● Real-Time Profitability

Instantly see which vehicles, drivers and routes are making money.

● Role-Based Security

Granular access control — Admin, Manager, Operator & Viewer roles.

● Works on Any Device

Web-based platform — desktop, tablet or mobile, no installation needed.

● Automated Payroll

Advances, deductions and loans feed automatically into salary settlement.

● 81 Modules, 11 Sections

The most comprehensive transport ERP for Sri Lankan operators.

TECHNOLOGY & ARCHITECTURE

Frontend PHP + Vue 3 — server-rendered with reactive UI components
